DEPRIVED FOOLS.

Nearly all castern daily papers have postraits of Guileau. He looks like the scrab, the atterly worthless fellow, the constitutional dead-best and shallow fool that he is. He is not insane, but a fool of the first water, pure, unquestionable, urterly despicable and diabolical. The man is a born fool (not an idiot) and his education and experience have but developed his original folly. He is that type of emphatic and mischievous fool who is far more dangerous than a pronounced limatic. The fool's mind is an abysa; It is unfathomable and past finding out. Such a creature as this is actually untit to live. The genus fool is the most dangerous and stubborn class of humanity, and when individuality is developed strongly as in this case, the typical fool becomes a dangerous as a magazine of powder or a charge of dynamite. Any force acting on him, as the rted inspiration of "stalwartism" acted on Guitean, may at any moment produce an The harmless fool is common enough. He is a bore and a misance, but still he can be tolerated. It is the permissions, de-prayed and deadly fool (who fortunately is more rare)—the fool of the type of Guitou-that has no right to live. A state of society like ours, with its moral, social, political and other depravities is well calculated to produce a steady supply of these, more or less rabid. Political and social reformation, through which dead-beats, vagabonds, and the whole vicious class who expect to live by pil-lage in one form or another, may be exterminated, is the only possible cure or remedy.

A SPECIMEN BRICK.

discovery of another hold swinds in connection with what is known as river and harbor improvement. All know that immense sams are appropriated every year for this purpose and there long has been a conviction in the public mind that much of the money was wasted, on we might better say, stolen. In vestigation would dombides demonstrate tha this is the case. The following is an instanin point: Last congress appropriated \$10,000 for the "improvement of L'Anguilla river," : little tayon emptying into the St. Francis, a small stream in Arkansas that empties into the Mississippi not far bolow Memphis. The Lith bayon is in the wilds of Arkansas, the only village on its banks numbering only 300 pec plo. In Momphis there is a company known as the St. Francis River Packet Co.; that company owns a steamboat, and that steamboat nust be employed to make money for its owners. This boat carried the mail under Brady's star route system, although there was more direct communication between the points by rail, and received \$13,500 per annum for that useless service. She also got the \$10,000 " for fooling at a let of little cotton wood saphogs," (as a local contemporary expressed it) under pretense of improving the navigation of the St. Francis river and developing the resources of the sbuth! There is a bid now on file in the department to carry the mail for \$2000 a year, and as to the "improvement" fund it was a pure steal. In other words, the people were taxed last year \$21,500 for the banefit of the Momphis and St. Francis Pecket And this is but a more item in the enor-

Garfield, then a member of congress, to move the adjournment of the house. The Congress occasion, which was in the usual style of his oratory. Incidentally he said: "This day, Mr. Speaker, will be sadly memorable so long as this nation shall endured which God grant may be bill the last syllable of recorded time, when the volume of human history shall be scaled up and delivered to the omnipotent judge. In all the future time, on the recursence of this day. I doubt not that the citizens of this republic will meet in solemn assumbly to reflect on the life and character of Abraham Lincoln and the awful tragic event of April 14, 1865—an event unparalleled in the history of nations, certainly unparalleled in our own. It is eminently proper that this house should this day place upon its records a memorial of

ruption of members of the common council ented in Tue Oreconian of Saturday, Mr Simon, calling at this office, expressly says that he knows nothing whatever of such atimpts, that all propositions of the kind al-leged,—if such were really made,—were not only without his authority but without his privity or knowledge, and that he challenges nvestigation before any tribunal whatever We give this statement the same publicity that we gave the former one, and add the remark that as so much has been said about this mat ter, the inquiry can not be undertaken too suon. In every case of this kind it is but justice to have all the ascertainable facts as soon as possible. We have not asserted that any attempt has been made to bribe members of the common council with Mr. Simon's knowledge or sanction, nor do we think he would give his sanction to such an act.

ing been uttered by visitors to the White ing been uttered by usinors to the white House, came from the lips of Coll Pabert 6. Ingersoll. So far as known not a ciergy man has knot: at the president's bedside. The fact is, we have not heard of-any minister being admitted there at all, nor more singular will of any minister calling to ask admittance. When it is noted in addition that and all the courageous remarks the playful remarks, the philosophical temerks, and the remarks conerning business marters attributed to Mr. Gardeld himself, no religious remarks have been yublished, it is calculated to make one womber as to what kind of atmosphere they e in the White House anyhow. Or is it the repurters fault.

On the 6th of July, Mr. Villard, and party were at Duluth. From there they started for the Yellowstone valley. One of the directors of the Northern Parific, accompanying the party, stated in an interview with a representative of the St. Paul Pioncer Press that the object

of the Oregon Trans Continental Company was their any harmony between the North-ern Pacific and the Oregon Railway and Nava-gation Company." He added: "It is a finan-To a movery probable that the president will recover.
